

Measurement Icons

Easily accessible measurement commands provide point-and-click simplicity – the most user-friendly geometric feature measurement on the market

Feature Labels

Graphical on-screen labels provide more action-ready data by allowing users to review results on-screen without picking a specific feature

Enhanced Layer Management

Pre-designed layers provide quick access to specific feature groups, including CAD, circles, spheres, etc.; simplifies the organization of measured and nominal data

The Fastest Software for CAD Files of Any Size!

CAM2 Measure X specializes in feature measurement/inspection and CAD-to-part comparison, where every measured part can be compared to engineering design files. In real-world tests, CAM2 Measure X exceeds the performance capability of any other CAD-based measurement software on the market. The new version of the program allows users load and render very large files faster than any other program – regardless of the system. The superior file-handling capability also empowers users to deal with entire CAD files.

Most Common Applications

Aerospace: Alignment, Tooling & Mold Certification, Part Inspection • **Automotive:** Tool Building & Certification, Alignment, Part Inspection • **Metal Fabrication:** OMI, First article inspection, Periodic Part Inspection • **Molding/Tool & Die:** Mold and Die Inspection, Prototype Part Scanning

Features

- ▶ Simple Go/No-Go Measurements
- ▶ CAD-to-Part Comparisons
- ▶ Full Functioned Feature Measurement
- ▶ Repeat Part Programming
- ▶ CAM2 SPC Graph SPC Reporting

Applications

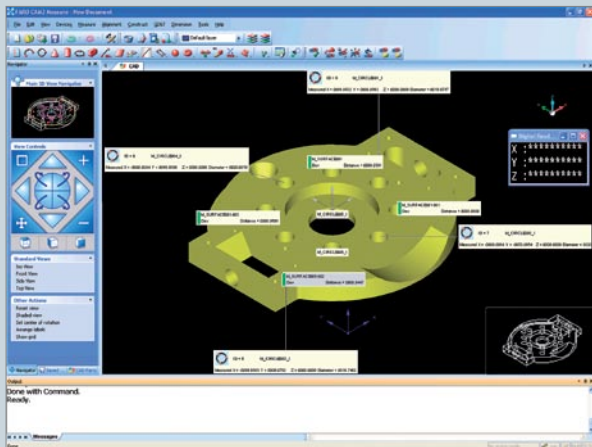

1. Define reference frame and set up an alignment

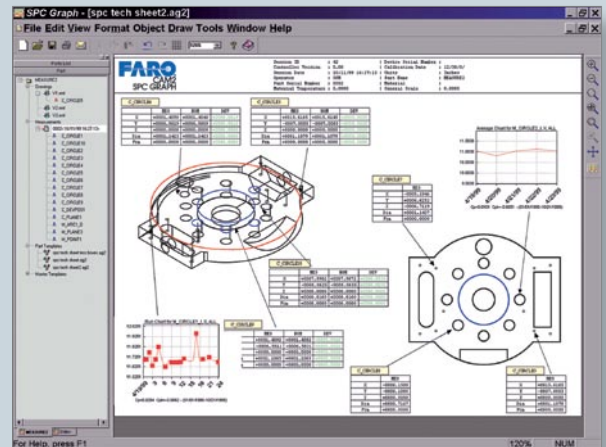

2. Measure your part

3. Compare measurements to CAD (Optional)

4. Report your results

Specifications

Platform: Windows® 2000 • Windows® XP

Data Input: Included - IGES, ASCII, VDA/FS & ACL Cost Options - Unigraphics, Solidworks, Parasolid, CATIA, Solid Edge, ProE & Inventor

Data Output: IGES
